ANNOUNCEMENT OF CHANGE IN BATTERY CELL SUPPLIER

Commitment to Maintaining Quality and Ensuring Stable Supply

Dear Valued Customers,

In light of the recent surge in market demand for battery cells, which exceeds the short-term supply capacity of the current manufacturer, REPT/EVE, we are pleased to announce that, in order to ensure timely delivery and maintain stability in the supply chain within the Vietnamese market, Lithium Valley has entered a strategic partnership with Greatpower, a leading battery cell manufacturer. And we will add WIFI function to the all coming orders.

Greatpower is one of the world's leading battery cell manufacturers, with over 20 years of experience, ranked as Tier 1 by BloombergNEF 2024, and being one of the top three manufacturers in the global residential ESS market (EESA) in 2023. By partnering with Greatpower, we have increased our supply capacity and added brand options for our battery cells.

During this time of high demand, Greatpower was selected as our new battery cell supplier for the following products: LV-BAT-W5.12Ac, LV-BAT-W10.24Ac, and W16-5A. To distinguish the batteries using Greatpower cells, we will apply stickers reading "AB version" on both the batteries and cartons.

Greatpowers battery cells meet international technical standards and rigorous requirements for durability, safety, and performance. And we confirm that the different cell batteries can be parallel, the usage period of battery should be less than 1 year.

Lithium Valley's Commitments:

1. Guaranteed Quality – Perfect Compatibility

Greatpower's battery cells have passed rigorous testing and are fully compatible with the existing Battery Management System (BMS).

2. No Change in Technical Specifications

The voltage, size, and interface specifications will remain unchanged, ensuring uniformity in design, installation, and operation. The product will maintain high performance with 6000cycles at 90% DoD (5KWh & 10KWh), 8,000 cycles at 90% DoD (16KWh).

3.Warranty Policy Remains Unchanged

Our customers will continue to enjoy the same 10-year warranty policy as before, with no adjustments to after-sales benefits.

We are committed to continuing to provide stable, sustainable, and high-quality energy storage solutions, despite global supply chain fluctuations. The trust and support of our customers are a great source of motivation for Lithium Valley to constantly improve and enhance our service capabilities.

Best regards,

Lithium Valley
